DETAILED ACTION

Examiner's Note

1. Due to the new grounds of rejection, the following action is being made non-final.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5, 8-10 and 15-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 16 are vague and indefinite because the limitation "according to the deviation of the measured value of at least one non-optical property from a given reference value for a reference-composition" is unclear. One would not know the composition of the reference-composition used in the process and would not know what extent of deviation of the measured value from what reference value would be used for regulating; therefore, the claim is indefinite. The reference-composition must be a known or identifiable reference-composition in order for the process to be practiced.

4. Claims 1 and 16 recite the limitation "the measured solutions" in lines 21 and 10 respectively. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

5. Claims 6-7 and 11-14 are allowed.
